

**2010 USAF Dental Laboratory Equipment/Product Survey (11/10)**

The USAF Dental Evaluation & Consultation Service (DECS) is compiling data on the equipment and materials used in USAF dental laboratories. This information will provide DECS with equipment/materials updates; identify equipment/materials which require further evaluation; and the opportunity to disseminate new product information. A questionnaire was mailed to every active duty USAF dental clinic and ADL in October. If you have any questions or did not receive a questionnaire, please contact DECS at DSN 429-7121 or via [e-mail](#). Please return the questionnaires no later than 1 December 2010. Thank you in advance for your assistance.
