

New Dental Equipment

Premier® Dental Products Company recently introduced the **2pro™ Total Access Disposable Prophy Angle**, a unique single-use, latex-free disposable prophy angle featuring a dual action prophy cup and pointed tip. The manufacturer states that the patented gearless design ensures no vibration, near-zero freeze-ups, and less heat build-up. The 2pro™ prophy cup is used for initial polishing. After removing the cup, the pre-mounted pointed tip can be used to access gingival and interproximal areas, bridges and veneer margins, around implants and orthodontic brackets, reportedly guaranteeing total access of all tooth surfaces. 2pro™ Total Access Disposable prophy angles fit nose-cone straight handpieces and are available in four various cup styles: soft/short (purple), firm/short (blue), soft/long (white), and firm long (green) for \$69.95 (144 per bag). Contact your local dental supplier for government pricing.

High Q Dental™ recently introduced the **ALOS-TTL Video Headlight** capture system. According to High Q Dental, the unique aspect of the ALOS-TTL is the ability to capture the procedure from the exact point of view using the 'Through the Lens' design. The Through the Lens design is said to align the camera coaxially with the illuminated field giving the viewer an on-target image with zero parallax. Images and video can be captured for later use or viewed in real-time. High Q Dental claims the ALOS-TTL uses various output options allowing for the system to be integrated with computer or video recording systems and monitors. The ALOS-TTL-H is available with the Nova 3, 200 watt Halogen Light Source for \$9,995.00 (suggested retail) and \$7,996.00 (government). The ALOS-TTL-X is available with the Nova 300, 300 watt Xenon Light Source for \$13,995.00 (suggested retail) and \$11,196.00 (government). Shipping is available to FPO/APO addresses. Shipping charges vary by location and method selected.

National Dental Inc™ recently introduced the Danish Third Generation High Speed Curing Light **FlashMax P3**. According to NDI, the unique aspect of the FlashMax P3 is that it is the most powerful curing light with an output of 4000-6000 mw/cm². NDI claims the FlashMax P3 is three times as powerful as plasma arc light and can cure 2-3 mm layers in 1 or 2 seconds. The FlashMax P3 was designed to be used as a pen or pistol with bilateral identical precision controls with a small neck for added visibility bringing the ergonomic benefit of this curing light to the user. The controls offer 1 and 3 second curing times with continuous or dual-burst program modes. The disposable tips come in 4 and 8 mm with a +/- 15 degree swivel capability for increased access. The FlashMax P3 is compatible with two disposable sheath options and comes with a 360 degree charging base. The unit runs on one Lithium ion battery that NDI claims will provide 200+ cures on a single charge. Materials are claimed to be cured at 440 – 480 nm. The FlashMax P3 comes with a 30-day money-back guarantee and a two-year warranty. The FlashMax P3 is available for \$1,695.00 (suggested retail) and \$1,195.00 (government) plus \$15.00 for shipping.
