

New Equipment

Pelton & Crane recently introduced the **Delta Q Sterilizer**. According to Pelton & Crane, it features a “closed door drying” process, allowing instruments to completely dry, preventing any interruptions of the sterilization process. The manufacturer states the sterilizer has a 12-minute start-up time, 16-minute sterilization cycle, and a final 30-minute drying cycle. The Delta Q also comes with a PC cable, which allows users to download sterilization history to a PC, reportedly eliminating the need for printers. However, an optional printer is available for purchase. It also features an ergonomic handle and a user-friendly touchpad. The sterilizer has four automatic sterilizing programs, and a fifth program for special items. The Delta Q sterilizer is available in both 8” and 10” chamber sizes, with optional cassette racks said to accommodate up to three large and three small cassettes per load. The Delta Q has electrical requirements of 110-120 VAC or 220-240 VAC requiring 20 amp circuit. There is a three-year warranty on all parts and a six-month full replacement guarantee for any manufacturing defects.

Item (order number)	Suggested Retail Price	Government Price
Delta Q 8” 115V (054202)	\$5,050.00	\$2,777.50
Delta Q 8” 230V (054203)	\$5,050.00	\$2,777.50
Delta Q 10” 115V (054200)	\$5,750.00	\$3,162.50
Delta Q 10” 230V (054201)	\$5,750.00	\$3,162.50
Cassette rack (024338)	\$199.00	\$93.50
Printer (optional) (041523)	\$599.00	\$359.40

LGE Dental Devices has recently introduced the **APX-21** electronic apex locator. The unit is specifically designed for a body-attached (wrist area) ECG patch electrode, eliminating the need for a lip-clip. The unit can still be used with a lip-clip attachment if desired. The APX-21 operates at frequencies above 50,000 Hz. This unit is promoted to work in either dry or humid canals, and also provides an audible alarm if the canal is flooded or too wet. The unit is equipped with a 90 x 35mm LCD screen. When approaching the apical constriction and the apex, the unit offers both visual and audible indicators. If not used, the device has an automatic two minute shut-off feature; this is said to prolong the life of the battery for up to 600 sessions. All attachments are fully autoclavable. Standard accessories include: file clip probe, lip hook electrode, measuring cable, touch probe, four AA 1.5 V batteries, and 60 ECG electrodes. The unit weighs 180 grams (6.3 ounces) without batteries, and is 70-mm wide x 70-mm deep x 120-mm high. There is a two-year warranty on the unit and a six-month warranty for all accessories and cables.

Item	Suggested Retail Price	Government Price
APX-21 (w/ECG electrodes)	\$1,099.00	\$989.00
APX-21 (w/o ECG electrodes)	\$999.00	\$899.00
ECG electrodes (30 per box)	\$13.50	\$12.15
