

## New Dental Equipment

DentaleZ Group recently introduced the new **OWL Touch** (On Wall Logic) control and monitoring system from RAMVAC. According to DentaleZ, the OWL Touch incorporates a new full color, touch screen display that provides easy control and monitoring of the dental utility room equipment. DentaleZ claims the OWL Touch is easy to understand and navigate giving the user status on up to 4 different categories of devices. RAMVAC vacuum units with the new S2 control and Air Compressors with the new C2 control (Smart Control) options are easily connected to the OWL Touch. Non-RAMVAC vacuum systems and air compressors can also be connected via the Interface Control giving the user maintenance notifications, fault messages and other system data on the color display. Water valves that utilize a solenoid can also be turned on and off utilizing an Interface Control. Auxiliary devices that are 10 amps or less such as lighting, stereo or intercoms can also be controlled by an Interface Control. The home screen is said to provide the ability to choose Manual or Scheduled run modes and has a Master Shutdown button. The OWL Touch models are available with either a four, eight or sixteen port OWL Hub device that is connected via a category 6 patch cable. The table below shows current options and pricing as of January 2013.

P/N	MODEL	RETAIL	GOVT.
005122	OWL Touch 4	\$1,290.00	\$670.80
005123	OWL Touch 8	\$2,265.00	\$1,177.80
