

New Equipment

RINN XCP-ORA™ One Ring and Arm Positioning System by DENTSPLY, is a universal ring and arm x-ray positioning system. The RINN XCP-ORA™ is said to simplify the radiographic process, with its color-coded, “3-in-1” positioner, allowing the dental team to take anterior, posterior, and bitewing radiographs with only one XCP arm and ring. According to DENTSPLY, the RINN XCP-ORA™ system is autoclavable, lightweight, rugged, and compatible with all XCP film bite blocks, and XCP-DS digital sensor bite blocks. All bite blocks are sold separately.

Item (order number)	Suggested Retail Price*	Government Price*
One ring, one arm (#550771)	\$104.99	\$63.31
Two rings, two arms (#550772)	\$189.99	\$114.56

*The prices listed are from DENTSPLY; prices may vary if purchased from another distributor.

Premier Dental Products Company recently introduced the **E-VENT™** disposable dual-arch fluoride tray with a saliva ejector port. The latex/bis-phenol-free tray evacuates saliva and excess fluoride materials through the saliva ejector port. The trays are described as flexible and easily contoured to the mouth, reducing patient anxiety and gag reflexes. **E-VENT™** trays are sold in boxes of 40 (medium size only). Contact your local dental supplier for pricing.
