

## New Dental Equipment

The **VELscope Vx** is the latest generation fluorescence-based oral mucosal screening device from LED Dental. According to the manufacturer, it is the first device FDA-cleared to help detect lesions that might not be visible to the naked eye and the first FDA-cleared device to help determine the appropriate surgical margin. The unit is cordless, portable and rechargeable and has a large illumination area for faster, more effective exams. It does not require dyes or rinses and the exam takes only 2 minutes per the manufacturer. According to the manufacturer, the VELscope Vx also aids the discovery of mucosal abnormalities such as: Viral, fungal and bacterial infections, inflammation from a variety of causes including lichen planus and other lichenoid reactions, and traumatic lesions and areas of local trauma. The VELscope Bundle includes disposables for 128 patients, patient brochures & posters, CE Webinar Training, and a VELscope digital camera system that connects directly to the VELscope Vx for convenient, real-time photo-documentation.

Mounting Type	Suggested Retail	Government Price
VELscope Vx Unit	\$2,749.00	\$1,746.00
VELscope Bundle	\$1,169.34	\$499.00
