

## New Infection Control Products

L&R Manufacturing Company recently introduced **Barrier Milk Ready to Use Spray**—an instrument protector/lubricant. According to L&R, Barrier Milk Ready to Use Spray helps prevent rust and corrosion of instruments when used before sterilization and protects and extends the life of instruments during autoclaving. The product is reportedly nitrate-free, chromate-free, phenolic-free, non-irritating, has a neutral pH, and a mild, pleasant odor. L&R claims the Barrier Milk Ready to Use Spray lubricates and maintains smooth working of hinged instruments and is specially formulated for dental and surgical instruments, hinges, box locks, and general equipment. Barrier Milk Ready to Use Spray is available in an 8-ounce bottle for \$15.00 (suggested retail) and \$10.49 (government).

L&R Manufacturing Company recently introduced **CounterZorb™ Ultra Absorbent Mats**. According to L&R, CounterZorb™ Ultra Absorbent Mats are designed with a superior multi-layer technology to protect surfaces and countertops from liquid spills, chemicals and contaminants. Each mat reportedly has a unique 6 ply construction including the polyethylene laminate backing which is water and chemical resistant along with cushioned surface pockets to protect glassware and delicate items from breakage. The mats are also soft, non-abrasive and won't scratch delicate surfaces or equipment. L&R claims CounterZorb™ Mats are easy to use—simply place a mat near the ultrasonic cleaner, autoclave, or sink and place your ultrasonic basket or other wet instruments on the mat and CounterZorb's unique design disperses the liquid throughout the mat, enhancing absorption. CounterZorb keeps the surface drier while acting as an infection control barrier against cross contamination. CounterZorb™ Ultra Absorbent Mats are available in packages of 25 mats for \$13.00 (suggested retail) and \$9.09 (government).

**Sure-Check® Sterilization Pouches** from Crosstex are reportedly the first and only pouches with built-in internal and external steam sterilization indicators. According to Crosstex, Sure-Check® Sterilization Pouches give you the assurance of confirming all three sterilization parameters: time, temperature and sterility contact with an internal multi-parameter steam indicator printed directly on the pouch thereby eliminating the extra step of adding a separate multi-parameter indicator to each pouch. Crosstex reports that the pouches have triple seals that prevent perforation; a heavy secure seal at the chevron for protection against instrument breaching; and are made of wet-strength treated medical-grade paper. When used in conjunction with weekly biological indicators, Sure-Check® Pouches with built-in multi-parameter indicators reportedly provide the highest level of sterility assurance.

Item #	Size	Quantity (per box)	Suggested Retail Price	Government Price
SCXS2	3½" x 5¼" / 9 x 13 cm	200	\$15.95	\$9.65
SCS2	3½" x 9" / 9 x 23 cm	200	\$16.95	\$9.95
SCM2	5¼" x 10" / 13 x 2 5 cm	200	\$24.95	\$14.95
SCL2	7½" x 3" / 19 x 33 cm	200	\$46.95	\$27.95
SCL12182	12" x 18" / 30 x 46 cm	100	\$50.95	\$30.25
