

New Infection Control Products

The third edition of **Cottone's Practical Infection Control in Dentistry** is now available. This book is a comprehensive infection control text that uses the latest scientific and clinical evidence and current infection control guidelines. The book presents easy-to-follow protocols as components of a basic infection control routine. A glossary of terminology and acronyms appears at the beginning of each chapter. The text is on the recommended textbook list for USAF Dental Clinics and is available for \$49.95 (suggested retail).

Becton, Dickinson and Company recently introduced the single-use **BD Vacutainer® Stretch Latex-Free Tourniquet**. BD claims the single-use, latex-free tourniquet will help avoid the risk of cross-contamination between patients and safeguard both you and your patients from latex allergens. The perforated design reportedly allows for easy, one-at-a-time dispensing of tourniquets from a compact box. The BD Vacutainer® Stretch Latex-Free Tourniquets are available for \$181.50 (25 per box/500 per case). Contact your local distributor for government pricing.

ProChek® S Steam Sterilization Integrators from Certol International, LLC are used inside sterilization packaging to assure that the load was processed at the correct sterilization parameters. According to Certol, three of the four parameters of sterilization are monitored: time, temperature, and sterilant. The integrator has a dramatic color change from yellow to purple when the parameters have been met. Also, the strips can be retained as part of a permanent record. A box of 100 ProChek® S Steam Sterilization Integrators is available for \$43.75 (suggested retail) and \$26.25 (government).
