

## New Infection Control Products

Crosstex International's **Steam Process Indicator Tape** is now latex and lead free. The process indicator tape is also reportedly biodegradable. The latex and lead free Steam Process Indicator Tape (60 yard rolls [3/4"]) is available for \$406.80 (suggested retail) and \$228.00 (government) with 24 rolls/case.

The latex-free **Comfort Plus™ Premium Saliva Ejector** from Crosstex International reportedly features rounded edges, smooth surfaces and perfectly placed suction ports helping to enhance patient comfort. According to Crosstex, the Comfort Plus™ also optimizes fluid removal, minimizes trauma to mucosal tissues, facilitates uninterrupted fluid and light debris removal, prevents tissue from blocking suction, and provides the user with greater efficiency while firmly holding its shape. Comfort Plus™ Premium Saliva Ejectors (10 bags/case with 100/bag) are available for \$49.50 (suggested retail) and \$28.20 (government).

Crosstex International recently introduced the **NON-LATEX Dental Dam** that is said to offer exceptional tear resistance with a lavender color to enhance tooth visibility. Crosstex claims that the medium-gauge dental dam (6" x 6") isolates procedures from blood and saliva and tongue and cheek interference, while reducing contaminated aerosols and risk of patients swallowing or aspirating foreign bodies. A box of 15 NON-LATEX Dental Dams is available for \$16.95 (suggested retail) and \$9.95 (government).

Hu-Friedy recently announced that it is now distributing **Team Vista™ Dental Waterline Cleaner** for

Vista Research Group. According to Hu-Friedy, VistaClean™ and VistaTab™ are part of the company's Team Vista™ Waterline Treatment System which is designed to help maintain clean waterlines. Team Vista™ is designed for use in independent bottle systems—add one or more VistaClean™ drops each time the water bottle is filled as irrigant and every week or as needed (usually monthly) add one VistaTab™ tablet to 750 mL of potable water (run one half of the amount through waterlines, wait five minutes and run the remainder through the lines followed by a rinse with 500 mL fresh water). VistaClean™ Irrigant Solution is reportedly a non-toxic and non-corrosive aqueous cleaner that is said to emulsify contaminants, soils, and oxidation products. VistaTab™ cleans microbial contaminants and creates a chlorine dioxide solution when placed in a water bottle. One box (product number: IMS-1450) of Team Vista™ Dental Waterline Cleaner by Hu-Friedy containing one 1-ounce bottle VistaClean concentrate and 5-1.7 gram VistaTab tablets is available for \$199.00 (suggested retail) and \$119.40 (government).
