

New Laboratory Products

Recently, VITA introduced its **VACUMAT 6000M** line of modular ceramic furnaces, which are said to provide an unprecedented level of adaptability to the dental lab. VITA states that the innovative design satisfies laboratory firing needs in an efficient and economical way. According to the manufacturer the heart of the system is its highly-engineered control units, which reportedly enables the operation of up to four furnaces using a single control. The control pads are available in three levels of customization: the vPad Easy, the vPad Comfort and the vPad Excellence. The VACUMAT 6000M unit has a two-year warranty.

Product	Suggested Retail Price	Government Price
Vacumat 6000M Firing Unit	\$2,650.00	\$2,120.00
vPad Easy	\$850.00	\$680.00
vPad Comfort	\$1,695.00	\$1,356.00
vPad Excellence	\$3,195.00	\$2,556.00
Vac 6000M Vacuum Pump 110V	\$795.00	\$636.00

GC America recently introduced the new **Initial IQ-One Body** Layering-over-Metal concept, part of their all-around ceramic system for every indication. The IQ-One Body reportedly provides technicians the same esthetic results repeatedly with fewer materials. According to GC, the four new Body materials are developed to reproduce all 16 standard VITA® shades which can be combined with the three-dimensional Lustre Pastes. These materials are said to be compatible with GC's existing metal-ceramic (MC)/Initial system and with many alloys. IQ-One Body is available in a compact ceramic set.

Product	Suggested Retail Price*	Government Price*
One-Body, Layering-over-Metal	\$494.99	\$386.09
Lustre Pastes Set	\$389.99	\$304.19

*Prices may vary if purchased from a distributor.
