

Synopsis of Endodontic Pulp Vitality Testers (Project #08-021) (1/10)

Endodontic pulp vitality testers are a useful diagnostic adjunct for both general dentists and endodontists. DECS was able to obtain information for three different endodontic pulp vitality testers from two manufacturers who replied to our request for information. As can be seen in the following synopsis, dentists have a limited selection of pulp testers available to them.

[Click here](#) to view the endodontic pulp vitality testers.
