

LIST OF CLINICAL PRIVILEGES – DIETITIAN

AUTHORITY: Title 10, U.S.C. Chapter 55, Sections 1094 and 1102.

PRINCIPAL PURPOSE: To define the scope and limits of practice for individual providers. Privileges are based on evaluation of the individual's credentials and performance.

ROUTINE USE: Information on this form may be released to government boards or agencies, or to professional societies or organizations, if needed to license or monitor professional standards of health care providers. It may also be released to civilian medical institutions or organizations where the provider is applying for staff privileges during or after separating from the Air Force.

DISCLOSURE IS VOLUNTARY: However, failure to provide information may result in the limitation or termination of clinical privileges.

INSTRUCTIONS

APPLICANT: In Part I, enter Code 1, 2, or 4 in each REQUESTED block for every privilege listed. This is to reflect your current capability. Sign, date and forward to your Clinical Supervisor.

CLINICAL SUPERVISOR: In Part I, using the facility master privileges list, enter Code 1, 2, or 4 in each VERIFIED block in answer to each requested privilege. In Part II, check appropriate block either to recommend approval, to recommend approval with modification, or to recommend disapproval. Sign, date and forward the form to the Credentials Office.

CODES: 1. Fully competent within defined scope of practice.

2. Supervision required. (Unlicensed/uncertified or lacks current relevant clinical experience.)

3. Not approved due to lack of facility support. (Reference facility master Strawman. Use of this code is reserved for the Credentials Function.)

4. Not requested/not approved due to lack of expertise or proficiency, or due to physical disability or limitation.

CHANGES: Any change to a verified/approved privileges list must be made in accordance with Service Specific Credentialing and Privileging Policy.

NAME OF APPLICANT

NAME OF MEDICAL FACILITY

I Scope		Requested	Verified
P389372	The scope of privileges for dietitians includes the nutritional screening, assessment, diagnosis, intervention (to include counseling, education, nutrition prescription for macro and/or micronutrient levels, appropriate route and consistency for providing nutrients, etc.), monitoring, evaluation and collaborative treatment of patients of all ages and across all stages of the life cycle with a variety of nutritional needs. Dietitians provide a range of individual, family, unit, and community services and programs in multiple settings including outpatient, inpatient and the community. Dietitians participate in transitions of care and refer patients to other healthcare providers, community agencies and programs.		
Diagnosis and Management (D&M)		Requested	Verified
Nutrition Assessment / Monitoring / Evaluation		Requested	Verified
P389380	Order swallow study		
P422498	Provide medical nutrition therapy (MNT), including nutrition assessment, nutrition diagnosis, develop and implement nutrition care plan/intervention, monitor and evaluate an individual's progress toward goals for medical conditions and disease including, but not limited to: anemia: nutritional deficiencies		
P422503	Provide medical nutrition therapy (MNT), including nutrition assessment, nutrition diagnosis, develop and implement nutrition care plan/intervention, monitor and evaluate an individual's progress toward goals for medical conditions and disease including, but not limited to: behavior health: eating disorders, alcohol dependency, chemical dependency, disordered eating, mental health and addictions		
P422531	Provide medical nutrition therapy (MNT), including nutrition assessment, nutrition diagnosis, develop and implement nutrition care plan/intervention, monitor and evaluate an individual's progress toward goals for medical conditions and disease including, but not limited to: cardiovascular: cerebrovascular accident, transient ischemic attack, coronary artery disease, heart failure, lipid metabolism, and hypertension; congenital heart disease		
P422532	Provide medical nutrition therapy (MNT), including nutrition assessment, nutrition diagnosis, develop and implement nutrition care plan/intervention, monitor and evaluate an individual's progress toward goals for medical conditions and disease including, but not limited to: critical illness or conditions: trauma, burns, wound care, pressure ulcers, malnutrition, and injury		
P422533	Provide medical nutrition therapy (MNT), including nutrition assessment, nutrition diagnosis, develop and implement nutrition care plan/intervention, monitor and evaluate an individual's progress toward goals for medical conditions and disease including, but not limited to: developmental disabilities: intellectual, autism spectrum disorders, Down syndrome, and spina bifida

Diagnosis and Management (D&M) (Cont.)		Requested	Verified
Nutrition Assessment / Monitoring / Evaluation (Cont.)		Requested	Verified
P422556	Provide medical nutrition therapy (MNT), including nutrition assessment, nutrition diagnosis, develop and implement nutrition care plan/intervention, monitor and evaluate an individual's progress toward goals for medical conditions and disease including, but not limited to: weight management: underweight, bariatric surgery, overweight, and obesity		
P422557	Prevent and mitigate disease by assessing adequacy and appropriateness of current diet therapy to include but not limited to: nutrition-related consequences, food and medication interactions for all medications (prescribed, over-the-counter, herbal, integrative and functional medicine), supplement use and feeding problems		
P422558	Conduct nutrition focused / evidence based assessment and recommend intervention as it relates to the patient's medical and /or surgical treatments		
P422560	Order / perform calorie count, weight, height and waist circumference measurements; perform basic nutrition focused physical examination (general survey, vital signs, skin, hair, nails, head, and neck)		
P422561	Order therapeutic diets, including, but not limited to, specific foods / beverages, specific caloric, micronutrient or macronutrient levels, meal frequency / timing, formulas, portion size, consistency and texture; medical food supplements and feeding assistance		
P422562	Order laboratory tests pertinent for assessment of biochemical nutritional parameters		
P422563	Order oral dietary supplements to include prenatal vitamins, vitamins, minerals, trace elements and bioactive substances (fiber, fish oil)		
Community Nutrition		Requested	Verified
P389392	Assess and identify population nutrition needs along with gaps and overlaps in provision of nutrition strategies, interventions and programs		
P389394	Prioritize population nutrition needs and develop a nutrition action plan utilizing multiple, evidence-based strategies, interventions and programs		
P389396	Monitor response to strategies, interventions and programs and evaluate effect on stated nutrition plan objectives		
P389402	Develop and implement evidence-based nutrition strategies, interventions and programs for population, community, and specific local sites.		
D&M Advanced Privileges: Requires documented additional training, experience, and demonstrated competency or demonstrated competency and Board Certification.		Requested	Verified
Nutrition Support (Certified Nutrition Support Dietitian)		Requested	Verified
P389406	Order parenteral nutrition / IV Fluid		
P389412	Order DXA (Dual-energy X-ray absorptiometry) to evaluate body composition		
Nutrition Support Procedures		Requested	Verified
P389414	Place nasoenteral feeding devices with physician order		
P389416	Perform indirect calorimetry		
P389418	Perform DXA to evaluate body composition		
Diabetes Management		Requested	Verified
P389424	Recommend initiation or adjustment of pharmacotherapy based on evaluation of pattern management		
P389428	Order and provide education on the use of test strips		
P422572	Instruct on basic trending of glucose; how to use personal data management tools for review and interpreting glucose patterns (home use)		
P422579	Order and provide education on the use of Glucometer		

CLINICAL PRIVILEGES – DIETITIAN (CONTINUED)			
D&M Advanced Privileges: Requires documented additional training, experience, and demonstrated competency or demonstrated competency and Board Certification. (Cont.)		Requested	Verified
Pediatrics (Certification in Pediatric Nutrition)		Requested	Verified
P389440	Perform SOS (Sequential Oral Sensory) sensory approach feeding therapy		
P389442	Perform DIR (Developmental Individual Relationship-based) directed approach feeding therapy		
Other Advanced Privileges		Requested	Verified
P422587	Adjust medications per established and approved disease-specific and condition specific protocol orders from the referring practitioner		
Nutrition Support		Requested	Verified
P422569	Order enteral nutrition to include enteral formulations, modulators (e.g., Protein, Glutamine) and/or bioactive substances (e.g., probiotics, fiber)		
P422570	Order placement verification of enteral nutrition support access devices		
Pediatrics		Requested	Verified
P422582	Recommend nutrition intervention / feeding regimens for the neonatal intensive care unit population, including, but not limited to nutrition management of necrotizing enterocolitis, Broncho pulmonary dysplasia, gastroschisis, and patent ductus arteriosus		
Sports Nutrition		Requested	Verified
P422583	Recommend initiation, adjustment and / or management of sports / dietary supplements and or dietary manipulation to optimize training, athletic performance, competition and recovery from competition or training		
P422584	Provide personalized training/sports medical nutrition therapy for special populations, to address: bone mineral disturbances, cardiovascular conditions, diabetes, disabled athletes, disordered eating, female athlete triad, food allergies, gastrointestinal disorders, high blood pressure, iron depletion, iron-deficiency anemia		
Other (Facility or provider-specific privileges only):		Requested	Verified
